

## INVASION OF THE BRAIN EATERS FROM OUTER SPACE!

In 1956, aliens infiltrate a high school in small town America to test a weapon before a full-out invasion, a weapon that is capable of changing reality and warping minds. Only our heroine Mary Sue seems immune to its effects and the fate of the planet rests with her. That's what happens...but the play is actually about a threat that is all too real, insidious and contemporary - book banning in school libraries.

### CHARACTERS:

ALIEN - a horrible space mutant
